

*Welcome to the Carlyle House experience*

We opened our doors in June of 2013 with a commitment to “do it better”. I am convinced more than ever that we are delivering on that promise. Our area is truly blessed with many fine Assisted Living complexes to choose from and we are proud to add to this family friendly tradition of care in our community. The *Carlyle House* offers 10 different room designs and as many lifestyle stations placed throughout the complex to stimulate the senses. The *Carlyle House* concept is being built on the foundation of my family’s 40 year senior health care experience in the Dayton area and a sincere desire to become a trusted member of the greater Kettering/Oakwood health care community.

The *Carlyle House* is locally owned and operated through the principles learned over a lifetime in service to the elderly. I have always held the belief that the environment and services at any Assisted Living facility should so strongly reflect the core values of the owner that he would build it to please his own mother. To this end, one of the first residents of the *Carlyle House* was my own mother. I desire something very special for her as I am sure you seek the same commitment to your own loved one’s safety and happiness. There has been a great deal of thought put into the *Carlyle House* concept and these design elements reflect the best of my senior housing experience and support our belief in making the lifestyle something very unique for all of our loved ones under our roof.

The original 51 suite *Carlyle House* residence has been specifically designed to reflect an inviting residential lifestyle. We intentionally offer our residents an intimate environment that has been designed to embrace the home-like qualities that I believe are so important to the special guests we serve. As an example, the kitchen area is the informal and recognized social gathering spot in most homes and the *Carlyle House* is no different. All meals are prepared and served from a Bistro, tastefully placed in each dining area and offering a minimum of three different levels of seating options from informal at the breakfast bar to a private dining atmosphere. This resident centered programming allows for the continuation of the social values we all take for granted in our own homes.

We have also built a separate 30 suite building immediately adjacent to our original assisted living community. The Renaissance offers memory care services in a residential setting with all of the care and services our community is so well known for.

The arboretum at the *Carlyle House* boasts a 10,000 square foot exterior gathering spot for the residents and family member’s enjoyment. The secured gardens feature a peaceful and tranquil space where residents can choose from everything from picnics with family under the pergola to working in the gardens and flower beds. The eight foot walls and wrought iron fencing is supported by security software that offers a worry free and safe environment to all that enjoy even a simple walk in the park.

I invite you to find out for yourself what we have to offer your loved one at the *Carlyle House*. The principles by which we manage are deeply rooted in our family’s experience in the senior housing community. The specialized individual care we offer each and every resident is centered on their own unique set of needs. This individualized approach greatly enhances the quality of care enjoyed by each and every resident at the Carlyle House. Come see for yourself why we are so excited about the lifestyle opportunities available for your loved one.

Respectfully Yours,

Greg Nelson, President
